

# Persimmon Tree Pond Repair

*Montgomery County, MD*

---

Project for construction services for the Persimmon Tree Community Association Pond Repair Project.

---

The project is part of construction for the Persimmon Tree Community Association Pond Repair Project (Asset #11030). Triangle Contracting provided construction and construction-related services including but not limited to the construction, repair, retrofit, alteration and modernization for the Persimmon Pond Repair Project. With a goal and object to repair the existing stormwater management dry pond, the project includes the removal of the existing embankment, outfall piping, portion of existing riprap, and installing a new drainage channel consisting of riprap, gabions and Reno Mattress. The work entails the installation of fill material to bring a portion of the channel to proper grade elevations and the stabilization of disturbed areas beyond the channel.

With this pond repair project, Triangle Contracting contributed to the Persimmon Tree community's efforts to maximize stormwater treatment, repair and construct control structures, spillway pipes, and storm drain outfalls. These improvements are critical to the community because they aid in the removal of harmful pollutants, health improvements of streams and rivers, establishment of swimmable waters, and improvement of the quality of the Chesapeake Bay.
