

Snowden's Ridge

Triangle Contract in was contracted to complete demolition, clearing, excavation, utilities and stormwater management.

Completion Date: March 2022

This project site is a small multi-family condo/apartment complex in Silver Spring, Maryland. The site was prepared with demo paving, concrete, curb and gutter and tree removal. Demolition was a difficult task on this jobsite due to their confined spaces, however Triangle was successful in site preparation. Excavation and utilities at the Community Building was performed for the installation of 4" PVC sewer installation with tie in. Additionally, storm water management drywell facilities including roof drains were installed at the complex.

Following stormwater management and utility work, concrete sidewalk and concrete curb and gutter were installed. The project was successfully finished with signage installation, landscaping, and forest restoration.
